

In The Claims

Kindly amend claim 1 as follows:

1. (amended) A process for supplementing infant formula comprising:

C2 a) obtaining at least two different microbial oils from different microbial sources, each said oil comprising a long chain polyunsaturated fatty acid in the form of a triglyceride [- containing microbial oils from at least two different microbial sources,] and

b) adding said oils to said infant formula.

2. (amended) The process of claim 1, wherein said oils are selected from oils containing  $\omega$ -3 and  $\omega$ -6 fatty acids.

In claim 7, line 1, kindly change "genera" to -- species --.

REMARKS

The above amendments are offered in an attempt to more clearly define the present invention. The amendment to claim 7 merely corrects a lack of antecedent basis. No change in scope is intended by these amendments. The amendment to the specification merely extracts examples from co-pending, commonly assigned patent applications which were incorporated by reference at page 2, line 32 through page 3, line 12. Accordingly, no new matter has been entered.

Applicant thanks the Examiner for the courtesies extended during the interview. While no resolution of the issues was achieved, it is believed that they were clarified. It is
